QUALITY – ENVIRONMENT – SAFETY POLICY

SMI Group integrated management system

SMI S.p.A. and the other companies belonging to the SMI group (SMIPACK – SMILAB – SMIENERGIA – SARCO RE) have adopted a Safety, Environment and Quality management system, in compliance with UNI EN ISO 9001:2008 (Quality Management System) and UNI EN ISO 14001:2004 (Environment Management System) and aim to achieve full compliance also with the international standard OHSAS 18001 (Occupational Health and Safety Assessment Series), which may be applied to any organization that wishes to establish a management system, in order to minimize hazards and risks to employees.

One of SMI Group's priorities is raising awareness about the commitments of the group's policy and getting the company's workers, suppliers, customers and the public involved with its objectives and goals.

In order to pursue its mission, the company adopted the following strategies:

Seeking continuous improvement.

Innovation and continuous improvement of the products range are a key objective that SMI Group has always been pursuing, by optimizing the funds destined to Research and Development and by constantly monitoring the level of customers' satisfaction. When designing and manufacturing its machines, Smigroup aims at preventing/minimizing their environmental impact. The new technical solutions, unlike the previous generation technology, must ensure considerable energy saving, minimized acoustic emissions, reduced air pollution, waste management within ecological limits, in order to improve the workplace environmental quality and safety.

Involving the suppliers.

SMI Group avails itself exclusively of reliable suppliers, selected according to severe parameters, in order to be sure of their compliance with its qualitative and environmental standards. Furthermore, the suppliers are made sensitive about the company's principles of social responsibility and are involved in initiatives aiming at making their company management fully compatible with SMI Group Quality, Environment and Safety Policy.

Involving the employees.

In order to achieve the main objectives of the Company Policy, it is essential to increase the employee's awareness of Quality, Environment and Safety topics, by organizing training and refreshing courses.

Constant monitoring of the company objectives.

The goals achieved in terms of environment, quality and safety are constantly monitored and checked by specialized auditors, who define the company degree of efficiency as to the target objectives established by the Company. Smigroup undertakes to improve its quality, environment and safety management system according to the auditors' suggestions or to modify it according to new legislative directives.
